Mining & Quarrying							
Miscellaneous							
<b>TOTAL OF ALL USES</b>							

## Portland Cement History by State and Market

This report summarizes estimated cement consumption in 46 different market classes for 56 states and partial state geographic areas. The report is released twice a year. Spring preliminaries are the first look at market level activity for the given year based on construction trends. The report is further refined with a fall final release as non-building data such as agriculture and oil well cement usage becomes available.

One year of data.
